

## TempControl® cold chain solutions

*TempControl safeguards your temperature-sensitive shipments.*

We know that as scientific discoveries advance, so do the needs of your pharmaceutical and life science shipments. That's why we made customer-specific processes the foundation of our TempControl product, working with you every step of the way to protect your temperature-sensitive shipments and ensure an intact cold chain.

### Care and oversight

From origin to destination, our specially trained staff actively manage and monitor your TempControl shipments so they remain in your preferred temperature range. With our certified handling stations located in key pharma markets, you'll benefit from our expansive global network and transport expertise.

### Booking and acceptance

To view schedules and locate more information about our services, visit [unitedcargo.com](http://unitedcargo.com). You can also find additional ways to reach us from around the world. Call our TempControl Tower at 1-877-525-4628 or email [tccargo@united.com](mailto:tccargo@united.com) for details.

### Available Tracking Devices

We have more than 80 electronic tracking and temperature-monitoring devices approved for use on United aircraft. Please visit [Approved GPS and tracking devices - United Cargo](#) for the latest information.

### Units approved and available for lease from United:

Please visit [Container Specifications on unitedcargo.com](#) for the latest information.

### Your solution for:
